Show Your Organization's Commitment to Safety

**CREATE A HIGHER LEVEL OF AWARENESS THROUGHOUT YOUR ORGANIZATION
AND ACHIEVE GREATER BUY-IN FOR ALL YOUR SAFETY INITIATIVES**

Can You Afford to Miss This Training?

According to OSHA statistics, companies were fined or penalized \$120 MILLION in 2014 during approximately 75,000 inspections. Look at a few of the judgments handed down just in the month of December alone:

- \$186,000 for **retaliation** against workers at a Washington power plant
- \$181,800 for **amputation and electrical hazards** at a stamping plant in Texas
- \$169,000 for willful, serious **excavation hazards** at a Florida construction company
- \$162,500 for **forklift and training violations** at a New Jersey beer distributor
- \$140,000 for **fall hazards** at a roofing company in Nebraska
- \$132,000 for **asbestos hazards** at 6 renovation firms in Illinois

Don't let yourself and your business become a statistic. When you've completed this course, you'll receive your 30-hour card from OSHA, signifying the highest level of commitment to safety and health in your organization. You'll be equipped to identify hazards everywhere in your company, create and maintain the highest-quality safety training programs for your employees and minimize the financial impact of workplace safety issues for your company.

Enroll today for this comprehensive training that can save you and your company hundreds of thousands of dollars down the line!

We're Inviting You to Attend This 30-hour OSHA Outreach Course and Arm Yourself With the Skills and Information You Need to:

- Show your employees—and OSHA inspectors—your organization's commitment to safety by earning your 30-hour outreach course completion
- Minimize your organization's exposure to costly penalties and fines
- Gain essential skills to assess the effectiveness of your overall safety programs and determine proper levels of compliance
- Reduce downtime and workers' compensation claims
- Identify valuable OSHA resources and network with other safety professionals

Attending This 30-hour Course Will Keep Your Company Healthy, Safe and Productive

The financial benefits of taking this 30-hour course can be staggering. Your work site will be safer and healthier, man-hours lost to injury and downtime will plummet and productivity will increase. Your insurance rates will reflect your commitment to safety, and you'll be able to sleep better at night knowing that you're doing everything you can to protect your company from costly noncompliance penalties.

This Is Serious Training That Isn't Dry and Tedious

Sometimes getting highly technical training can be as exciting as watching paint dry. We promise that when you attend this training event, you won't just sit there getting a five-day lecture! We've packed these sessions with interactive exercises that will give you practical experience you can use immediately. Plus, you'll get a firsthand look at many of the resources and tools you'll need to create your own training back at work.

And, upon successful completion of this course, you'll receive your outreach course completion from OSHA that shows your deep commitment to the safety and health of your employees.

Act Now and Save Your Company From Expensive Fines

This 30-hour outreach course is the #1 way to keep your workplace safe and compliant and save you from costly fines. So even if you only use one strategy that saves your company from a compliance error—or an employee from a life-threatening injury—this program will more than pay for itself several times over. Don't wait another minute! **Call 1-800-258-7246 and enroll today. Or register online at NationalSeminarsTraining.com/OSH5.**

Your Complete **5-day** Course Agenda

Course Schedule: Monday – Thursday 8:30 a.m. – 4:30 p.m. Friday only 8:30 a.m. – 3:00 p.m.

DAY ONE

- Introduction to the safety movement
- Determining rights and responsibilities under Section 2 of the OSH Act
- The General Duty Clause—Section 5(a)(1) and 5(b)
- The 4 elements of an effective safety program
- Inspection priorities, citations and penalties
- How to prepare and develop an action plan for an OSHA inspection
- Introduction to the OSHA General Industry Standards
- Walking-working surfaces—Subpart D

DAY TWO

- Egress and emergency action plans—Subpart E
- Fire protection and prevention—Subparts E and L
- Identification and control of hazardous energy—Subpart J
- 4 key elements of the Lockout/Tagout Standard
- Electrical safety standards—Subpart S
- Introduction to industrial hygiene—Subpart Z and the critical differences between safety and health hazards
- An overview of the most common types of health hazards

DAY THREE

- The Hazard Communication Standard (1910.1200)
- Outside contractors: What are your responsibilities?
- Bloodborne pathogens—Subpart Z (1910.1030)
- The Top 10 bloodborne pathogens violations
- What is all the fuss about ergonomics? (Previous standard 1910.900)

- The definition of confined spaces—Subpart J
- Flammable and combustible liquids—Hazardous materials Subpart H
- Workplace violence: OSHA's role in identification and prevention

DAY FOUR

- Personal protective equipment—Subpart I
- How to conduct a hazard assessment
- Machine guarding—Subpart O and the hazards of machinery
- Material handling and storage—Subpart N
- OSHA training and education requirements
- Medical services and first aid—Subpart K
- Safety and health programs (Foundation for Voluntary Protection Program)
- The advantages for your company of being a VPP work site

DAY FIVE

- The elements of an effective safety program
- Overview of behavioral safety
- Achieving—and maintaining—safety excellence
- Record keeping and reporting (29 CFR, Part 1904)
- Creating an audit-proof record-keeping system
- Mock OSHA inspection

Protect Yourself Against the Most Common OSHA Violations

On average, 88 workers a week—or more than 12 workers per day—are killed on the job. Unfortunately, many of these accidents could have been prevented if only the company had properly trained its staff on required safety procedures. Don't let a senseless tragedy or a crippling financial penalty be the reason you finally take OSHA requirements seriously.

If any of these situations apply to you, YOUR BUSINESS AND YOUR EMPLOYEES ARE AT RISK.

Fall Protection (Construction standard) 8,241 violations

Any time a worker is at a height of 4 feet or more, the worker is at risk and needs to be protected. Fall protection must be provided at 4 feet in general industry, 5 feet in maritime and 6 feet in construction.

Hazard Communication 6,156 violations

Chemical manufacturers and importers are required to evaluate the hazards of the chemicals they produce or import and prepare labels and safety data sheets to convey the hazard information to their downstream customers.

Scaffolding (Construction standard) 5,423 violations

Scaffold accidents most often result from the planking or support giving way or from the employee slipping or being struck by a falling object.

Respiratory Protection 3,879 violations

Respirators protect workers against insufficient oxygen environments, harmful dusts, fogs, smokes, mists, gases, vapors and sprays. These hazards may cause cancer, lung impairment, other diseases or death.

Powered Industrial Trucks 3,340 violations

Each year, thousands of employees are injured when forklifts are inadvertently driven off loading docks, lifts fall between docks and an unsecured trailer, they are struck by a lift truck or they fall while on elevated pallets and tines.

Lockout/Tagout 3,254 violations

“Lockout/Tagout” refers to specific practices and procedures to safeguard employees from the unexpected startup of machinery and equipment or the release of hazardous energy during service or maintenance activities.

Ladders (Construction standard) 3,311 violations

Occupational fatalities caused by falls remain a serious public health problem. The U.S. Department of Labor (DOL) lists falls as one of the leading causes of traumatic occupational death, accounting for 8 percent of all occupational fatalities from trauma.

Electrical, Wiring Methods 3,452 violations

Working with electricity can be dangerous. Engineers, electricians and other professionals work with electricity directly, including working on overhead lines, cable harnesses and circuit assemblies. Others, such as office workers and salespeople, work with electricity indirectly and may also be exposed to electrical hazards.

7 Key Benefits of Attending This Critical Training Event

1. Gain a thorough understanding of how OSHA works; violations that can affect your company and industry; and OSHA's process for dealing with accidents, illnesses and worker complaints
2. Get up-to-the-minute information on the latest general industry changes in OSHA regulations and standards
3. Reduce the time it takes to handle OSHA record keeping—while still meeting the rigorous requirements
4. Use proactive safety-audit tools to significantly reduce—or possibly eliminate—the number of accidents and injuries in your workplace
5. Assess your organization's level of compliance and shore up areas of weakness
6. Alert your organization to proposed OSHA changes so you can take them into account when planning for future growth
7. Know which resources to turn to for up-to-the-minute information on OSHA rules

WHO SHOULD ATTEND?

Safety professionals, managers and supervisors, HR personnel, business owners, industrial engineers ... any person responsible for the safety of employees

Schedule

The use of this seal confirms that this activity has met HR Certification Institute's® (HRCI®) criteria for recertification credit pre-approval.

NST is recognized by SHRM to offer Professional Development Credits (PDCs) for the SHRM-CPSM or SHRM-SCPSM. This program is valid for 30 PDCs for the SHRM-CP or SHRM-SCP. For more information about certification or recertification, please visit www.shrmcertification.org.
